For the Attention of Startups and MSMEs

Facing challenges in low-temperature/liquefier systems, cryogenic and superconducting technologies? Engage with ICC to find solutions to your cryogenic challenges efficiently.

The Indian Cryogenics Council (ICC) offers industry and startups direct access to a distinguished pool of low-temperature physicists, cryogenic engineers, gas liquefaction experts, and superconducting materials and magnet specialists

ICC Expertise Covers:

- Cryogenic system design, optimization, and troubleshooting
- Helium and hydrogen liquefaction & refrigeration
- Superconducting materials, magnets, and cryogenic integration
- Vacuum systems, thermal insulation, and instrumentation
- Scale-up challenges for industrial and startup applications
- Reliability, efficiency, and safety assessments

Why ICC?

✓ Decades of domain experience

✓ Practical, solution-oriented guidance

✓ Independent, confidential technical consultation

✓ Strong academia–industry interface
